Go Green!

TIRE GLOVE

CAR ON Y TIENT

BECAUSE WE CARE

The Reusable Tire Bag

Disposable bags are an evident source of pollution with a life span of about 20 minutes. Once in the environment, it will take up to 400 years to break-down, leaving tiny toxic bits of particles in our physical surroundings.

In 2007, we counted over 4 millions vehicles on the road within the province of Quebec , Canada. Since year 2008, the legislation requiring the replacement of winter tires, no later than December 15th of every year, would certainly increase the already existing 15 thousands tons of plastic bags remaining in our provincial landfills. It belongs to car owners to take part in the Green turn, reducing the negative effects of disposing plastic rubbish in our surroundings. **The reusable tire**

bag, having a longer life expectancy, constitutes a valuable solution for car owners. **The Tire Glove** is equipped with convenient carry on straps, and is made strong enough to support a tire and it's rim for many years.

The reusable tire bag is an affordable and convenient option to carry, and store your tires.

Main features of the reusable tire bag

- It generates less garbage annually.
- Offered at a very low price.
- You can fit every car tire size (One size fits all).
- The bag's material is made of Polyester 500D, PU Coated.
- It covers the whole rim and tire.
- Easier to carry your tires without filth and messiness.
- It protects the tire from the sun, dust and bad weather .
- It reduces the smell of rubber.
- Hand washable

Statistics

- In North America only, there are over 380 billions different kind of plastic being used every year.
- It would take 8,7 plastic bags to recuperate fossilized energy for a car to cruise on 1 km distance.
